

## General product risk analysis

The risk analysis of products serves to identify potential hazards and ensure safety for users. It includes assessing the probability of occurrence and the severity of possible damage as well as defining suitable protective measures. This structured approach ensures that risks are minimized and safe operating conditions are created.

1. general information

**Product group:** Crate corners

**Date:** 21.11.2024

2. types of risk

General types of risk that may be relevant for this product group are listed below.

Type of risk	Picto	Severity (very low)1 to 7 (high)
Caution, contains sharp screws or nails		1-2
There is a risk that children could choke on the small parts		1-2
There is a risk of suffocation if small children pull the packaging over their heads		1-2
There is a risk of slipping due to the packaging		1-2

1. general information

**Product group:** Cabinet hangers

**Date:** 21.11.2024

2. types of risk

General risk types that may be relevant for this product group are listed below.

Type of risk	Picto	Severity (very low)1 to 7 (high)
Risk of injury to the head		1-2
Attention screws, nails and dowels		1-2
Risk of injury to the fingers		1-2
Risk of injury to the head		1-2
There is a risk that children could choke on the small parts		1-2
Risk of small parts of the packaging being swallowed		1-2

<p>There is a risk of suffocation if small children pull the packaging over their heads</p>		<p>1-2</p>
<p>There is a risk of slipping due to the packaging</p>		<p>1-2</p>
<p>Sharp corners</p>		<p>1-2</p>

1. general information

**Product group:** Connecting fittings

**Date:** 21.11.2024

2. types of risk

General risk types that may be relevant for this product group are listed below.

Type of risk	Picto	Severity (very low)1 to 7 (high)
Caution, contains sharp screws or nails		1-2
Risk of small parts of the packaging being swallowed		1-2
Risk of injury to the fingers		1-2
Risk of injury to the head		1-2
Child not in the cupboard		1-2
Sharp corners		1-2

<p>Risk of small parts of the packaging being swallowed</p>		<p>1-2</p>
<p>There is a risk of suffocation if small children pull the packaging over their heads</p>		<p>1-2</p>
<p>There is a risk of slipping due to the packaging</p>		<p>1-2</p>

1. general information

**Product group:** Cover caps

**Date:** 21.11.2024

2. types of risk

General risk types that may be relevant for this product group are listed below.

Type of risk	Picto	Severity (very low)1 to 7 (high)
Risk of small parts of the packaging being swallowed		1-2
Risk of small parts of the packaging being swallowed		1-2
There is a risk of suffocation if small children pull the packaging over their heads		1-2
There is a risk of slipping due to the packaging		1-2
Sharp corners		1-2

## 1. general information

**Product group:** Spacer rings

**Date:** 25.11.2024

## 2. types of risk

General risk types that may be relevant for this product group are listed below.

Type of risk	Picto	Severity (very low)1 to 7 (high)
Risk of small parts of the packaging being swallowed		1-2
Risk of small parts of the packaging being swallowed		1-2
There is a risk of suffocation if small children pull the packaging over their heads		1-2
There is a risk of slipping due to the packaging		1-2
Sharp corners		1-2

1. general information

**Product group:** Flap fittings

**Date:** 25.11.2024

2. types of risk

General risk types that may be relevant for this product group are listed below.

Type of risk	Picto	Severity (very low)1 to 7 (high)
Risk of small parts of the packaging being swallowed		1-2
Attention screws, nails and dowels		1-2
Risk of injury to the fingers		1-2
Risk of injury to the head		1-2
Risk of small parts of the packaging being swallowed		1-2
There is a risk of suffocation if small children pull the packaging over their heads		1-2

There is a risk of slipping due to the packaging		1-2
Sharp corners		1-2

## 1. general information

**Product group:** Hinges and hinges

**Date:** 25.11.2024

## 2. types of risk

General risk types that may be relevant for this product group are listed below.

Type of risk	Picto	Severity (very low)1 to 7 (high)
Risk of small parts of the packaging being swallowed		1-2
Attention screws, nails and dowels		1-2
Risk of injury to the fingers		1-2
Damage due to overload		1-2
Damage due to overload		1-2
Damage due to overload		1-2

Risk of injury to the head		1-2
Risk of small parts of the packaging being swallowed		1-2
There is a risk of suffocation if small children pull the packaging over their heads		1-2
There is a risk of slipping due to the packaging		1-2
Sharp corners		1-2

## 1. general information

**Product group:** Fasteners, latches, hooks

**Date:** 25.11.2024

## 2. types of risk

General risk types that may be relevant for this product group are listed below.

Type of risk	Picto	Severity (very low)1 to 7 (high)
Risk of small parts of the packaging being swallowed		1-2
Attention screws, nails and dowels		1-2
Risk of injury to the fingers		1-2
Risk of small parts of the packaging being swallowed		1-2
There is a risk of suffocation if small children pull the packaging over their heads		1-2
There is a risk of slipping due to the packaging		1-2

Sharp corners		1-2
---------------	---	-----

1. general information

**Product group:** Cupboard interior fittings

**Date:** 25.11.2024

2. types of risk

General risk types that may be relevant for this product group are listed below.

Type of risk	Picto	Severity (very low)1 to 7 (high)
Risk of small parts of the packaging being swallowed		1-2
Attention screws, nails and dowels		1-2
Risk of injury to the fingers		1-2
There is a risk of bumping into the object and injuring yourself (especially in small rooms)		1-2
Risk of small parts of the packaging being swallowed		1-2
There is a risk of suffocation if small children pull the packaging over their heads		1-2

There is a risk of slipping due to the packaging		1-2
Sharp corners		1-2

## 1. general information

**Product group:** Glass overlays, glass door locks

**Date:** 25.11.2024

## 2. types of risk

General risk types that may be relevant for this product group are listed below.

Type of risk	Picto	Severity (very low)1 to 7 (high)
Risk of small parts of the packaging being swallowed		1-2
Attention screws, nails and dowels		1-2
Shards can cause cuts		2-3
Risk of small parts of the packaging being swallowed		1-2
There is a risk of suffocation if small children pull the packaging over their heads		1-2
There is a risk of slipping due to the packaging		1-2

Sharp corners		1-2
---------------	---	-----

## 1. general information

**Product group:** Locks

**Date:** 25.11.2024

## 2. types of risk

General risk types that may be relevant for this product group are listed below.

Type of risk	Picto	Severity (very low)1 to 7 (high)
Risk of small parts of the packaging being swallowed		1-2
Attention screws, nails and dowels		1-2
Risk of injury to the fingers		1-2
Risk of injury to the head		1-2
Risk of small parts of the packaging being swallowed		1-2
There is a risk of suffocation if small children pull the packaging over their heads		1-2

There is a risk of slipping due to the packaging		1-2
Sharp corners		1-2

1. general information

**Product group:** Drive-in nuts and sockets

**Date:** 25.11.2024

2. types of risk

General risk types that may be relevant for this product group are listed below.

Type of risk	Picto	Severity (very low)1 to 7 (high)
Risk of small parts of the packaging being swallowed		1-2
Attention screws, nails and dowels		1-2
Risk of small parts of the packaging being swallowed		1-2
There is a risk of suffocation if small children pull the packaging over their heads		1-2
There is a risk of slipping due to the packaging		1-2
Sharp corners		1-2

1. general information

**Product group:** Screws and dowels

**Date:** 25.11.2024

2. types of risk

General risk types that may be relevant for this product group are listed below.

Type of risk	Picto	Severity (very low)1 to 7 (high)
Risk of small parts of the packaging being swallowed		1-2
Attention screws, nails and dowels		1-2
Risk of small parts of the packaging being swallowed		1-2
There is a risk of suffocation if small children pull the packaging over their heads		1-2
There is a risk of slipping due to the packaging		1-2
Sharp corners		1-2

## 1. general information

**Product group:** Door stop strips

**Date:** 25.11.2024

## 2. types of risk

General risk types that may be relevant for this product group are listed below.

Type of risk	Picto	Severity (very low)1 to 7 (high)
Risk of small parts of the packaging being swallowed		1-2
There is a risk of suffocation if small children pull the packaging over their heads		1-2
There is a risk of slipping due to the packaging		1-2
Sharp corners		1-2

## 1. general information

**Product group:** Shelf supports

**Date:** 25.11.2024

## 2. types of risk

General risk types that may be relevant for this product group are listed below.

Type of risk	Picto	Severity (very low)1 to 7 (high)
Risk of small parts of the packaging being swallowed		1-2
Attention screws, nails and dowels		1-2
Risk of injury to the fingers		1-2
Risk of injury to the head		1-2
Risk of injury from overloading		2-3
Risk of small parts of the packaging being swallowed		1-2

<p>There is a risk of suffocation if small children pull the packaging over their heads</p>		<p>1-2</p>
<p>There is a risk of slipping due to the packaging</p>		<p>1-2</p>
<p>Sharp corners</p>		<p>1-2</p>

1. general information

**Product group:** Swing door hinges

**Date:** 25.11.2024

2. types of risk

General risk types that may be relevant for this product group are listed below.

Type of risk	Picto	Severity (very low)1 to 7 (high)
Risk of small parts of the packaging being swallowed		1-2
Attention screws, nails and dowels		1-2
Risk of injury to the fingers		1-2
Risk of injury to the eyes		5-6
Risk of injury to the eyes		5-6
Risk of small parts of the packaging being swallowed		1-2

<p>There is a risk of suffocation if small children pull the packaging over their heads</p>		<p>1-2</p>
<p>There is a risk of slipping due to the packaging</p>		<p>1-2</p>
<p>Sharp corners</p>		<p>1-2</p>

1. general information

**Product group:** Worktop connectors

**Date:** 25.11.2024

2. types of risk

General risk types that may be relevant for this product group are listed below.

Type of risk	Picto	Severity (very low)1 to 7 (high)
Risk of small parts of the packaging being swallowed		1-2
Attention screws, nails and dowels		1-2
Risk of injury to the fingers		1-2
Risk of injury from overloading		1-2
Risk of small parts of the packaging being swallowed		1-2
There is a risk of suffocation if small children pull the packaging over their heads		1-2

There is a risk of slipping due to the packaging		1-2
Sharp corners		1-2

1. general information

**Product group:** Complete drawers

**Date:** 28.11.2024

2. types of risk

General risk types that may be relevant for this product group are listed below.

Type of risk	Picto	Severity (very low)1 to 7 (high)
There is a risk that children could choke on the small parts		1-2
Damage due to overload		1-2
Risk of injury if the product tips over		2-3
Risk of injury if the product tips over		2-3
Risk of injury to the fingers		1-2
Attention screws, nails and dowels		1-2

Risk of injury to the fingers		1-2
Sharp edges		1-2
Risk of slipping		1-2
Risk of children suffocating under the packaging		1-2
Risk of children suffocating under the packaging		1-2

1. general information

**Product group:** Roller runners, ball bearing runners, underfloor runners

**Date:** 28.11.2024

2. types of risk

General risk types that may be relevant for this product group are listed below.

Type of risk	Picto	Severity (very low)1 to 7 (high)
Damage due to overload		1-2
Attention screws, nails and dowels		1-2
Risk of injury if the product tips over		2-3
Risk of injury if the product tips over		2-3
There is a risk that children could choke on the small parts		1-2
Risk of injury to the fingers		1-2

Risk of injury to the fingers		1-2
Risk of small parts of the packaging being swallowed		1-2
There is a risk of suffocation if small children pull the packaging over their heads		1-2
There is a risk of slipping due to the packaging		1-2
Sharp edges		1-2

## 1. general information

**Product group:** Accessories for pull-out systems

**Date:** 28.11.2024

## 2. types of risk

General risk types that may be relevant for this product group are listed below.

Type of risk	Picto	Severity (very low)1 to 7 (high)
Damage due to overload		1-2
Attention screws, nails and dowels		1-2
Risk of injury if the product tips over		2-3
Risk of injury if the product tips over		2-3
There is a risk that children could choke on the small parts		1-2
Risk of injury to the fingers		1-2

<p>Risk of injury to the fingers</p>		<p>1-2</p>
<p>Risk of small parts of the packaging being swallowed</p>		<p>1-2</p>
<p>There is a risk of suffocation if small children pull the packaging over their heads</p>		<p>1-2</p>
<p>There is a risk of slipping due to the packaging</p>		<p>1-2</p>
<p>Sharp edges</p>		<p>1-2</p>

## 1. general information

**Product group:** Cup hinges

**Date:** 28.11.2024

## 2. types of risk

General risk types that may be relevant for this product group are listed below.

Type of risk	Picto	Severity (very low)1 to 7 (high)
Attention screws, nails and dowels		1-2
Damage due to overload		1-2
Damage due to overload		1-2
Risk of injury to the head		1-2
There is a risk that children could choke on the small parts		1-2
Risk of injury to the fingers		1-2

<p>Risk of injury</p>		<p>1-2</p>
<p>Broken glass can cause cuts</p>		<p>2-3</p>
<p>Risk of small parts of the packaging being swallowed</p>		<p>1-2</p>
<p>There is a risk of suffocation if small children pull the packaging over their heads</p>		<p>1-2</p>
<p>There is a risk of slipping due to the packaging</p>		<p>1-2</p>
<p>Sharp edges</p>		<p>1-2</p>

1. general information

**Product group:** Hinges, drills, dampers, accessories

**Date:** 28.11.2024

2. types of risk

General risk types that may be relevant for this product group are listed below.

Type of risk	Picto	Severity (very low)1 to 7 (high)
Attention screws, nails and dowels		1-2
Damage due to overload		1-2
Damage due to overload		1-2
Risk of injury to the head		1-2
There is a risk that children could choke on the small parts		1-2
Risk of injury to the fingers		1-2

Risk of injury		1-2
Broken glass can cause cuts		2-3
Risk of injury		2-3
Risk of small parts of the packaging being swallowed		1-2
There is a risk of suffocation if small children pull the packaging over their heads		1-2
There is a risk of slipping due to the packaging		1-2
Sharp edges		1-2

1. general information

**Product group:** Sliding door fittings

**Date:** 28.11.2024

2. types of risk

General risk types that may be relevant for this product group are listed below.

Type of risk	Picto	Severity (very low)1 to 7 (high)
Attention screws, nails and dowels		1-2
Risk of injury from heavy parts		2-3
Risk of injury if the product tips over		2-3
Risk of injury due to heavy and unstable parts		2-3
There is a risk that children could choke on the small parts		1-2
Risk of injury to the fingers		1-2

Risk of injury due to heavy and unstable parts		1-2
Risk of injury due to heavy and unstable parts		1-2
Risk of injury		2-3
Risk of small parts of the packaging being swallowed		1-2
There is a risk of suffocation if small children pull the packaging over their heads		1-2
There is a risk of slipping due to the packaging		1-2
Sharp edges		1-2

1. general information

**Product group:** Accessories for sliding door systems

**Date:** 28.11.2024

2. types of risk

General risk types that may be relevant for this product group are listed below.

Type of risk	Picto	Severity (very low)1 to 7 (high)
Risk of small parts of the packaging being swallowed		1-2
Attention screws, nails and dowels		1-2
Risk of injury to the fingers		1-2
Risk of injury		2-3
Risk of small parts of the packaging being swallowed		1-2
There is a risk of suffocation if small children pull the packaging over their heads		1-2

There is a risk of slipping due to the packaging		1-2
Sharp corners		1-2

1. general information

**Product group:** Accessories furniture feet with packaging

**Date:** 21.11.2024

2. types of risk

General risk types that may be relevant for this product group are listed below.

Type of risk	Picto	Severity (very low)1 to 7 (high)
There is a risk that the load-bearing capacity will not be met.		1-2
There is a risk of tipping over if you sit on the edge of the furniture.		1-2
There is a risk that the piece of furniture will break if the screw is not tight.		1-2
Risk of suffocation from the plastic packaging if the item is unpacked and the packaging material is not disposed of immediately.		1-2
There is a risk of suffocation if a child pulls the bag over their head		3

<p>There is a risk of slipping on the polybag.</p>		<p>1-2</p>
--	---	------------

1. general information

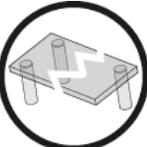

**Product group:** Furniture feet

**Date:** 21.11.2024

2. types of risk

General risk types that may be relevant for this product group are listed below.

Type of risk	Picto	Severity (very low)1 to 7 (high)
There is a risk that the load-bearing capacity of the furniture leg will not be maintained.		1-2
There is a risk that too few furniture feet are used for a piece of furniture and that the piece of furniture becomes unstable as a result.		1-2
There is a risk of tipping over if you sit on the edge of the furniture.		1-2
There is a risk that the piece of furniture will break if the screws are not tight.		1-2
Risk of suffocation from the plastic packaging if the item is unpacked and the packaging material is not disposed of immediately.		1-2
There is a risk of suffocation if a child pulls the bag over their head.		3
There is a risk of slipping on the polybag.		1-2

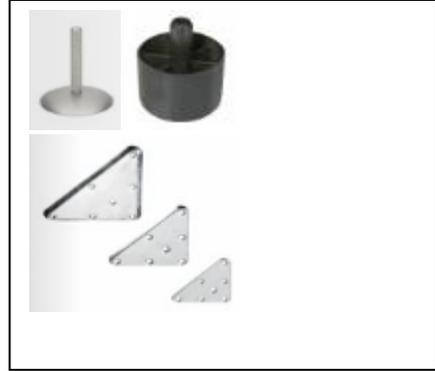

## 1. general information

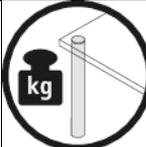

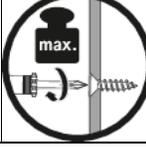

**Product group:** Accessories Furniture feet without packaging

**Date:** 21.11.2024

## 2. types of risk

General risk types that may be relevant for this product group are listed below.

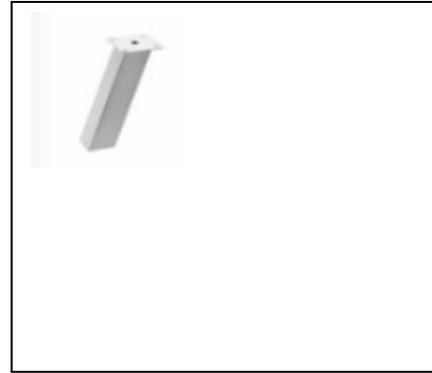

Type of risk	Picto	Severity (very low)1 to 7 (high)
There is a risk that the load-bearing capacity will not be met.		1-2
There is a risk of tipping over if you sit on the edge of the furniture.		1-2
There is a risk that the piece of furniture will break if the screw is not tight.		1-2

1. general information

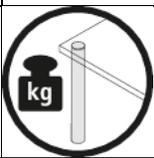

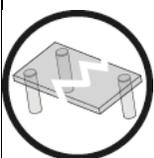

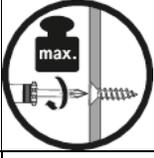

**Product group:** Counter console

**Date:** 21.11.2024

2. types of risk

General risk types that may be relevant for this product group are listed below.

Type of risk	Picto	Severity (very low)1 to 7 (high)
There is a risk that the load-bearing capacity of the furniture leg will not be maintained.		1-2
There is a risk that too few furniture feet are used for a piece of furniture and that the piece of furniture becomes unstable as a result.		1-2
There is a risk of tipping over if you sit on the edge of the furniture.		1-2
There is a risk that the piece of furniture will break if the screws are not tight.		1-2
Risk of suffocation from the plastic packaging if the item is unpacked and the packaging material is not disposed of immediately.		1-2
There is a risk of suffocation if a child pulls the bag over their head.		3
There is a risk of slipping on the polybag.		1-2

1. general information

**Product group:** Neofeet

**Date:** 21.11.2024

2. types of risk

General risk types that may be relevant for this product group are listed below.

Type of risk	Picto	Severity (very low)1 to 7 (high)
There is a risk that the load-bearing capacity of the furniture leg will not be maintained.		1-2
There is a risk that too few furniture feet are used for a piece of furniture and that the piece of furniture becomes unstable as a result.		1-2
There is a risk of tipping over if you sit on the edge of the furniture.		1-2
There is a risk that the piece of furniture will break if the screws are not tight.		1-2
Risk of suffocation from the plastic packaging if the item is unpacked and the packaging material is not disposed of immediately.		1-2
There is a risk of suffocation if a child pulls the bag over their head.		1-2
There is a risk of slipping on the polybag.		1-2

1. general information

**Product group:** Folding table leg

**Date:** 21.11.2024

2. types of risk

General risk types that may be relevant for this product group are listed below.

Type of risk	Picto	Severity (very low)1 to 7 (high)
There is a risk that the load-bearing capacity of the furniture leg will not be maintained.		1-2
There is a risk that too few furniture feet are used for a piece of furniture and that the piece of furniture becomes unstable as a result.		1-2
There is a risk of tipping over if you sit on the edge of the furniture.		1-2
There is a risk that the piece of furniture will break if the screws are not tight.		1-2
Risk of suffocation from the plastic packaging if the item is unpacked and the packaging material is not disposed of immediately.		1-2
There is a risk of suffocation if a child pulls the bag over their head.		3
There is a risk of slipping on the polybag.		1-2

There is a risk of getting your fingers caught in the folding mechanism.

1-2

## 1. general information

**Product group:** Cable aperture

**Date:** 21.11.2024

## 2. types of risk

General risk types that may be relevant for this product group are listed below.

Type of risk	Picto	Severity (very low)1 to 7 (high)
There is a risk of suffocation from the plastic packaging if the item is unpacked and the packaging material is not disposed of immediately.		1-2
There is a risk of suffocation if a child pulls the bag over their head.		3
There is a risk of slipping on the polybag.		1-2
There is a risk of fingers becoming trapped in the folding mechanism.		1-2

## 1. general information

**Product group:** Furniture handles and knobs

**Date:** 21.11.2024

## 2. types of risk

General risk types that may be relevant for this product group are listed below.

Type of risk	Picto	Severity (very low)1 to 7 (high)
Caution, contains sharp screws or nails		1-2
There is a risk that children could choke on the small parts		1-2
There is a risk of bumping into handles and buttons		1-2
Risk of small parts of the packaging being swallowed		1-2
There is a risk of suffocation if small children pull the packaging over their heads		1-2
There is a risk of slipping due to the packaging		1-2

## 1. general information

**Product group:** Door coat hangers, adhesive hooks, S-hooks and suction hooks

**Date:** 21.11.2024

## 2. types of risk

General risk types that may be relevant for this product group are listed below.

Type of risk	Picto	Severity (very low)1 to 7 (high)
There is a risk of bumping into the object and injuring yourself (especially in small rooms)		1-2
Risk of small parts of the packaging being swallowed		1-2
There is a risk of suffocation if small children pull the packaging over their heads		1-2
There is a risk of slipping due to the packaging		1-2

## 1. general information

**Product group:** Coat racks and hooks

**Date:** 21.11.2024

## 2. types of risk

General risk types that may be relevant for this product group are listed below.

Type of risk	Picto	Severity (very low)1 to 7 (high)
Caution, contains sharp screws or nails		1-2
Risk of small parts of the packaging being swallowed		1-2
There is a risk of bumping into the object and injuring yourself (especially in small rooms)		1-2
There is a risk that the object will not be securely attached to the wall		1-2
There is a risk that the object is not securely attached to the wall		1-2
There is a risk of bumping into the object and injuring yourself (especially in small rooms)		1-2

<p>Risk of small parts of the packaging being swallowed</p>		<p>1-2</p>
<p>There is a risk of suffocation if small children pull the packaging over their heads</p>		<p>1-2</p>
<p>There is a risk of slipping due to the packaging</p>		<p>1-2</p>

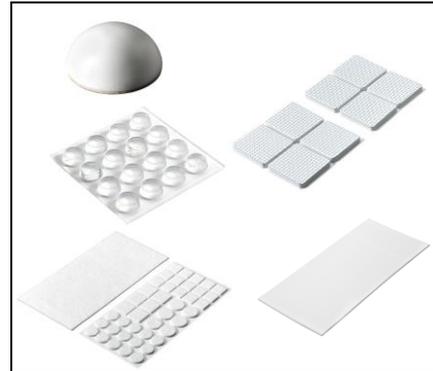

## 1. general information

**Product group:** self-adhesive furniture glides, - glide blanks, - anti-slip pads, - anti-slip pad blanks and bumpers

**Date:** 25.11.2024

## 2. types of risk

General risk types that may be relevant for this product group are listed below.

Type of risk	Picto	Severity (very low)1 to 7 (high)
Furniture moves unexpectedly and causes scratches or instability		1-2

Risk of injury when opening the packaging		3-4
Children or pets swallow packaging material		5-7

<p>There is a risk of suffocation if small children pull the packaging over their heads</p>		<p>5-7</p>
---	---	------------

## 1. general information

**Product group:** Door stoppers, wedges, door wedges, window locks, wooden wedges, door holders, bumpers  
**Date:** 25.11.2024

## 2. types of risk

General risk types that may be relevant for this product group are listed below.

Type of risk	Picto	Severity (very low)1 to 7 (high)
Furniture moves unexpectedly and causes scratches or instability		1-2
Tipping over of furniture or damage to floors		1-2
The user trips over a loose or fallen product and causes injury		1-2
Risk of injury when opening the packaging		3-4
Children or pets swallow packaging material		5-7
There is a risk of suffocation if small children pull the packaging over their heads		5-7

1. general information

**Product group:** Foot caps and insert glides

**Date:** 25.11.2024

2. types of risk

General risk types that may be relevant for this product group are listed below.

Type of risk	Picto	Severity (very low)1 to 7 (high)
Furniture moves unexpectedly and causes scratches or instability		1-2
Tipping furniture		1-2
Injuries during handling during application or removal		3-4
Children or pets swallow material		5-7
Risk of injury when opening the packaging		3-4
Children or pets swallow packaging material		5-7
There is a risk of suffocation if small children pull the packaging over their heads		5-7

## 1. general information

**Product group:** Furniture glides for screwing and nailing on, plastic furniture glides for screwing on, wall buffers and door stoppers for screwing on or gluing on  
Date: 25.11.2024

## 2. types of risk

General types of risk that may be relevant for this product group are listed below.

Type of risk	Picto	Severity (very low)1 to 7 (high)
The user could injure himself when hammering or screwing on the product.		3-4
The piece of furniture could tip over and cause injury, especially to children or pets.		3-4
